LINOTYPE IMPROVEMENT INFORMATION SHEET

NO. 250

PIVOTING FRONT ASSEMBLING GUIDE (MODEL 29-30)

A crimp has been added to the lower end of the pivoting front assembling guides. This will provide a better guiding condition for the matrices into the oscillating front. It will also eliminate the possibility of matrices catching on the oscillating front guide, piling up and injuring the cover on the oscillating front.

APPLIED IN FACTORY TO MODELS

All new Models of 29-30 Series.

OUTSTANDING MODELS

Can be applied to outstanding Models 29-30 by substituting twenty one new J-5115 for positions 1 to 21 inclusive and five new J-5118 for positions 23 to 27 inclusive.

First applied to Model 29(4)(90), Serial #53031.
