

GAS PRESSURE REGULATOR

A Gas Pressure Regulator (F-7964) has been adopted for application on single machine installations. The purpose of this Regulator is to control and maintain a pressure of from 3 1/2 to 5 inches of water to insure efficient operation of the Gas Pot where Natural, Butane and other special gases are employed.

A Close Nipple (F-8053) and a Reducer (F-8054) with 1/4 and 3/8 Pipe thread are made available for application of the Regulator. Note: When applying be sure the Arrow on Regulator is pointing in the direction of the flow of Gas.

OUTSTANDING MODELS

Can be applied to all outstanding 30 and 42 Em Machines equipped with Gas Pot. See Mailing Sheet #653.

First applied to Model for Supply condition.
