

CHANNEL ENTRANCE LOCATING BLOCK

An improved construction has been designed for the Channel Entrance Locating Block which eliminates the necessity of removing and transposing as the present blocks on the Magazine Frames required heretofore.

This new construction is provided with a removable projecting piece that can be shifted from one slot to another in the new permanently located blocks.

Without disturbing the blocks, the projecting piece can be switched from 72 character entrance location to 90 character location and vice versa.

APPLIED IN FACTORY TO MODELS

Blue Streak Models 33(4)(72-90), 34(4)(72-90)
