

LINOTYPE IMPROVEMENT INFORMATION SHEET

NO. 334

F-8975 CABLE AND GUARD, ASSEMBLED

The Hydraquadder Left-Hand Vise Jaw and Guard, has been improved by molding a plastic plug around the wire terminal. The plastic plug holds the wire terminal in place and prevents the possibility of grounding, thereby causing false operation of the pot pump safety.

OUTSTANDING MODELS

Can be applied to Outstanding Linotypes equipped with the Hydraquadder by ordering the F-8975 cable and guard which now includes the plastic plug.
